PROFESSIONAL SUMMARY

Computer Science graduate (FAST-NUCES, June 2026) with hands-on experience across full-stack web development, Python/FastAPI backends, applied AI (RAG, computer vision), and cloud/DevOps. Built end-to-end systems including real-time CV monitoring, async document pipelines, MERN web apps, and AWS microservices with infrastructure-as-code. Five-month AI internship in an Agile, Git-based team. 100+ LeetCode problems solved. Open to AI, backend, full-stack, web, and DevOps roles.

WORK EXPERIENCE

AI Intern

August 2025 – December 2025

Komatsu Pakistan Soft

Islamabad, Pakistan

- Collaborated with cross-functional development team using Git, GitHub, and Agile methodologies across prototype and integration delivery phases.
- Supported integration, debugging, and documentation of AI-driven software components in a production-oriented engineering environment.

EDUCATION

Bachelor of Science in Computer Science

August 2022 – June 2026

FAST-NUCES

Islamabad, Pakistan

A-Levels

September 2020 – June 2022

BMI-A

Islamabad, Pakistan

O-Levels

September 2018 – June 2020

BMI-B

Islamabad, Pakistan

PROJECTS

ForeSyte (Final Year Project)

2025 – 2026

FastAPI, YOLOv8, React, Computer Vision

- Built real-time exam integrity monitoring system using YOLOv8 object detection, FastAPI inference APIs, and a React alert dashboard in a 3-layer architecture.

Startup & Law RAG

2025 – 2026

FastAPI, Celery, React, RAG, PostgreSQL

- Developed RAG application serving entrepreneurs with grounded answers on business formation and compliance across 2 legal domains via async ingest-retrieve-generate pipeline.

FastCite

November 2025 – December 2025

FastAPI, Celery, React, RAG, PostgreSQL

- Built RAG-based study assistant with semantic document search and automated citation generation across 2 user workflows.

Attendance App

2025

AWS EC2, Kubernetes, Terraform, Ansible, CI/CD, Microservices

- Deployed microservices-based attendance platform on AWS with infrastructure-as-code covering provision, configure, and deploy lifecycle stages.

EventSync

2024 – 2025

MongoDB, Express.js, React.js, Node.js (MERN Stack)

- Developed full-stack event management web application with MongoDB data modeling, Express.js RESTful APIs, and React.js frontend.

Crypto Trading Bot (Blockchain Course)

2024

Python, Flask, Pine Script, Binance API

- Built automated cryptocurrency demo trading bot using TradingView webhooks, Flask REST endpoints, and Binance Spot Testnet API with trade logging.

GYM Management System

2024

C#, SQL Server

- Implemented desktop gym management application with relational data modeling and secure SQL Server backend.

EventaX

2024

Java, JavaFX

- Built desktop event management application with JavaFX GUI using Singleton and Factory design patterns.

TORCS Game Bot

2024

Python, Artificial Neural Networks (ANN)

- Trained autonomous racing agent with ANNs for lap navigation in the TORCS racing simulator.

IPFS-Inspired File System

2024

C++, B-trees, Hashmaps, Linked Lists

- Simulated file system using B-trees, hashmaps, and linked lists for core storage operations.

Hospital Management System (Network)

2024

Cisco Packet Tracer, VLANs, Routing

- Simulated hospital network infrastructure covering VLANs, routing, and network security.

Games & Systems Projects

2023 – 2024

C++/SFML, MASM, OS Concepts

- Built Tetris, SpaceShooter, and PACMAN (C++/SFML); PACMAN in MASM assembly; OS concepts including forking and semaphores; Grocery Store frontend app.

SKILLS

- **Languages:** Python, JavaScript, TypeScript, C++, Java, C#, SQL, Assembly (MASM)
- **Frontend:** React, HTML5, CSS3, JavaFX
- **Backend:** FastAPI, Flask, Express.js, Node.js, RESTful APIs, Microservices
- **AI / ML:** RAG (Retrieval-Augmented Generation), LLMs, Generative AI, NLP, Computer Vision, YOLOv8, ANN, Prompt Engineering
- **Databases:** MongoDB, PostgreSQL, SQL Server
- **DevOps & Cloud:** Docker, Kubernetes, Terraform, Ansible, AWS EC2, CI/CD, Infrastructure as Code (IaC)
- **Async & Pipelines:** Celery, Task Queues, ETL-style Workflows
- **Blockchain:** Binance API, Pine Script, Webhook Integration
- **Tools:** Git, GitHub, Agile, Scrum | **Competitive Programming:** 100+ LeetCode problems solved
